TIPS - The Technology Feed Vol 5, #2 (November, 2005)

...maintained by Jeffrey L. Jones, Site Admin, last updated 8/21/2006

Welcome to the 2nd edition of TIPS, The Feed, for 2005-06! This accumulator contains blog content created by **Technology Resource Teachers** from the **Office of Instructional Technology**, covering a variety of topics and interests concerning the integration of technology into instruction.

<p>TIPS - The Editor's Desk</p> <p>Brief musings on the implementation of technology integration in Fayette County Schools...from the Office of Instructional Technology</p>  <p>...from the desk of Jeffrey L. Jones, Site Admin</p>	<p>Tuesday, November 01, 2005 8:39 AM: Interactivity On-Line, NSBA, and other stuff</p> <p>A recent discussion on the KYDTC listserv (a Kentucky Educational Technology System discussion for district tech coordinators, and maintained by the University of Kentucky) looked at interactive sites for young people, and how to block them. In contrast, this edition of TIPS looks at how we can <i>provide</i> online interactivity opportunities for our students! Look for blog entries from Lucinda Sanders, coordinator of the Fayette County IMMEX grant project, continuing contributions from Fayette County Forum coordinator Leanna Prater, and contributions to a blog maintained by attendees of the National School Boards Association T+L² 2005 conference in Denver, Colorado.</p> <p>...for more, visit this blog at https://edtech.fcps.net/blog/blogs.aspx?blogid=10067</p>

We are gearing up for some great discussions this week about landforms and bodies of water that exist in the regions where we live.</p> <p>Here is one of my favorite postings from 4th graders in Wyoming:</p> <p>Greeting Forum Friends! I am so excited that we have the opportunity to learn about your homestates and towns. My 4th grade class is from Jackson, Wyoming (sometimes called Jackson Hole- -fur trappers called any valley surrounded by mountains, a "hole" - - and this was Davey Jackson's place to hunt waaaaaay back when). We have lots of wildlife here, but right now my favorite is the elk. What animals live near you?</p> <p>...for more, visit this blog at https://edtech.fcps.net/blog/blogs.aspx?blogid=122</p>

Wednesday, September 28, 2005 12:06 PM: STLs in Barren Co. - Students earn levels

Here's a quote from Valerie Stokes, TRT in Barren Co.: "Barren County has focused the last three years on changing the ideals of STLP from that of a "club" program to one that is an integral part of every student's daily life at school and abroad. Student's technology skills and applications are kept in a portfolio throughout their tenure at Barren County and they work toward achieving levels of STLP recognition. The levels are designed to address different components of technology and leadership getting more difficult and diverse as students advance towards the highest level of Pioneer. This has been an excellent tool to encourage teachers to seek ways that they can assist the students in their classrooms by offering many different types of technology integrated lessons which students can use in their levels application. IT has also been instrumental in broadening the awareness of our faculty and administration that technology is a true component of our every day lives. Many of our schools still have various types of organized STLP activities but they are along with not in place of, the true concept of STLP."

Interesting concept. What do you think? Go to [Barren County STLP](#) to check it out.
